PHILIPS AVENT

### For your child's safety and health WARNING!

- Always use this product with adult supervision. After opening, immediately dispose of the product or store it in a place out of babies' reach.
- Never use feeding teats as a soother.
- Continuous and prolonged sipping of fluids will cause tooth decay.
- Always check food temperature before
- Heating in a microwave oven may produce localised high temperatures. Take extra care when you heat up drinks in a microwave.
- Keep all components not in use out of

- Do not allow children to play with small parts or walk/run while using bottles or cups.
- Do not place in a heated oven.
- To avoid scalding, allow hot liquids to cool before preparing the feeds.
- Drinks other than milk and water, such as fruit juices and flavoured sugary drinks are not recommended. If they are used, they should be well diluted and only used for limited periods, not constantly sipped.
- To ensure the bottle functions correctly and to prevent leakage, always make sure you: remove any debris or residue that may collect around the rim of the bottle before assembly, and avoid overtightening the bottle screw ring when
- the reach of children.
  - assembling it onto the bottle. Expressed breast milk can be stored

in sterilised Philips AVENT bottles/

- containers in the refrigerator for up to 48 hours (not in the door).
- Check the bottle before each use to ensure all components are attached correctly. If you discover any damage, cracks or broken pieces on the bottles are fragile and should be used with care - do not let the baby use the bottle
- When the glass bottle is wet, handle with extra care to avoid slippage.
- When the surrounding temperature or the temperature of the glass bottle is low, do not immerse the bottle directly into boiling water to prevent cracks to the bottle.
- To avoid cracks, never use iced water to cool the glass bottle. Instead, use running water to cool the bottle, or immerse the bottle in a basin containing an appropriate amount of cold water.

- The glass bottle will remain hot following sterilization. To prevent burns, use the bottle tong to take the bottle or wait until cooling down.
- Do not use metal spoons to stir glass
- Do not place the glass bottle in the
- Please read this instructions carefully before using the appliance
- Please keep this instruction book for future reference.

- Before first use Remove the paper pad under the teat before first use.
- Clean and sterilise the product. Place in boiling water for 5 minutes. This is to ensure hygiene.

Clean before each use Wash and rinse thoroughly, then sterilise using a Philips AVENT steriliser or boil

for 5 minutes, Refer to the user manual of the steriliser for more details of the appliance.

- Do not use corrosive antibacterial cleaners, chemical solutions or highlyconcentrated detergents with your products.
- Do not place any components on surfaces that have been cleaned with antibacterial agents.
- Dishwasher safe food colourings may discolour components.

### Teats

- Inspect before each use and pull the feeding teat in all directions. Throw away at the first signs of damage or weakness.
- Make sure you use a teat with the correct flow rate when you feed your
  - - For hygiene reasons, we recommend replacing teats after 3 months.

For hygiene reasons, remove all

- components and store in a dry container with a lid.
- Store the bottle and its components away from heat sources and direct sunlight. Do not immerse them in the detergent (sterilising solution) over the recommended time.
- Teats available in newborn, slow, medium, fast and variable flow rates Only use Classic teats with Classic
- To buy accessories or spare parts, visit www.shop.philips.com/service or go to your Philips dealer. You can also contact the Philips Consumer Care Center in

your country. Philips AVENT is here to help: 4008 800 008
